High School/Secondary School.

2018/2020

Angels Public Senior Secondary School.

University/College.

2020-24

Galgotias College of Engineering & Technology

Projects

Flight Booking System.

C++ Language

To overcome the limitations of the currently used manual approach, the Flight Ticket Booking approach was created. The goals of this software are to lessen or remove the problems with the current system.

Bus Reservation System:

MySQL

The main goal of this project is to automate the activities of a travel agency, assuring quick transaction processing and getting rid of mistakes in things like computations and bill production.

Website:

Wordpress/ Web development

I have developed a website known as "Miri Movies." This platform has been designed to provide users with the ability to access a wide range of movies and television shows, both for online streaming and downloading purposes.
